

TransitionBridge Virginia

VIRGINIA • PRE-EMPLOYMENT TRANSITION SERVICES

Every student's path to a first job, in one place.

Students with disabilities in Virginia can get **free** help getting ready for work before they leave high school. That help only happens when four groups work together: the **school**, a **state counselor**, a **provider** who runs the classes, and **state leaders** who oversee it all. TransitionBridge gives all four one shared place to follow the same student — each person sees the part that matters for their job.

IF YOU ONLY

10 sec.

It's one window so Virginia can see every Pre-ETS referral — from **school** to **counselor** to **provider** to **outcome** — so no student gets lost in the middle.

How one student moves across the bridge

FOUR STEPS • ONE SHARED RECORD

STEP 1 • SCHOOL

The school refers

A coordinator fills in one short form. Most details fill in for them.

STEP 2 • COUNSELOR

A counselor matches

New referrals wait in one list, oldest first, and get paired with a provider.

STEP 3 • PROVIDER

The provider serves

They accept the student and log each class or session as it happens.

STEP 4 • STATE

Leaders see results

A live statewide view of who is waiting, where help is missing, and what works.

What is "Pre-ETS"?

Pre-Employment Transition Services — free job-readiness help for students with disabilities. In Virginia, a student can qualify at **age 14 or older** if they have an **IEP**, a **504 plan**, or another documented disability. The student does not have to already be a client of the state agency.

A school, a parent, or another provider can make the referral. TransitionBridge keeps track of it from that moment on.

The five kinds of help

- 1 Job exploration counseling
- 2 Work-based learning experiences
- 3 Counseling on college & training options
- 4 Workplace readiness training
- 5 Instruction in self-advocacy

THE PROBLEM

The problem isn't that people don't care. It's that the information is scattered.

Today each group keeps its own list, so a student can be referred and then sit waiting — because nobody has one place to check: *Did the counselor get it? Did a provider say yes? Are services happening?*

TODAY — FOUR SEPARATE LISTS

School

Email and paper forms

Counselor

The agency's own case system

Provider

Spreadsheets, typed up weekly

State

Reports pulled together weeks later

Everyone works hard, but nobody sees the whole picture. "Where are we?" usually means a phone call.

WITH TRANSITIONBRIDGE — ONE SHARED PATH

SCHOOL Referral sent

COUNSELOR Provider matched

PROVIDER Services logged

STATE Results, live

Same student, same story. Each person sees their part, and everyone sees the same status at the same time.

Four questions that are hard to answer quickly today

The answers exist, but they're spread across schools, counselors, and providers. TransitionBridge puts each on one screen.

1 Which school divisions sent no referrals this quarter?

A division that refers no one is invisible today. Here it appears by name.

2 How many referrals are waiting, and for how long?

Anything waiting more than 14 days is flagged automatically.

3 Which counties have no provider nearby?

A statewide map shows where students are waiting and no help is close.

4 Of students who finished services, how many got jobs?

Outcomes are tracked as they happen, not just in year-end reports.

Follow one student from start to finish

ILLUSTRATIVE EXAMPLE

The part that doesn't exist today: the school that sent the referral can open this same timeline and see who accepted it, when services started, and whether the student got a job — without a single phone call.

FOUR PORTALS • ONE STUDENT RECORD

One student, seen from four chairs.

Each person signs in to their own portal. The screens differ — the student's story is the same.

School portal

For school transition coordinators

"I referred a student last month. Where does it stand?"

- ✓ Refer a student on one short form — details on file fill in for you
- ✓ Watch each referral's status live, the same way the counselor sees it
- ✓ A list of students old enough to be referred who haven't been yet

Value: minutes to refer, and no more calling to ask "where are we?"

Counselor portal

For state vocational rehabilitation counselors

"Which students have been waiting the longest?"

- ✓ One queue of new referrals, oldest first
- ✓ A clear flag when a student waits more than 14 days
- ✓ Suggested providers, with the reason shown: distance, open spots, services

Value: nobody sits in a pile — the oldest case is always on top.

Provider portal

For organizations that deliver the services

"Who's new, and how do I record today's session?"

- ✓ An inbox to accept new students — or decline with a reason
- ✓ Log a service in seconds, or a whole group session at once
- ✓ A scorecard for jobs, wages, and who is still working 90 days later

Value: less paperwork, and proof of the good work being done.

State leadership portal

For program directors and state leaders

"How is the whole state doing — right now?"

- ✓ Every region, school division, and provider on one screen
- ✓ A map of where students need help and no provider is nearby
- ✓ Outcomes and required spending tracked all year, not only at year-end

Value: problems show up in time to fix them.

What makes it different

No student slips through

Every referral is tracked from the day it's sent. If one sits too long, it's flagged.

See where help is missing

The map shows counties with students waiting and no provider close by.

Reports without the scramble

Required state and federal reports come from records staff already keep. No re-typing.

Easy on day one

Built for busy people between meetings. Each screen has one clear next step. No training.

Accessible to everyone

Works with a keyboard and screen reader, and every chart has a plain table behind it.

Works alongside current systems

It doesn't replace anyone's existing records system. It connects the dots between them.

HANDS-ON • ABOUT 2 MINUTES

Try the demo in three steps.

1

Open the demo site

Type this address into any web browser, or scan the code with your phone's camera: transitionbridge-virginia.netlify.app

2

Click "Sign in to the demo"

The orange button at the top right of the home page. No password, nothing to set up.

3

Pick an account and look around

You'll see the product exactly as that person does. Click **Switch account** anytime to see the same student from a different chair.

Common questions

Is this real student data?

No. Every student and number is made-up demonstration data, so it can be shown safely. The idea is real; the numbers are not.

Does it replace the systems we already use?

No. It works alongside them. People keep working as they do today — now everyone sees the same picture.

What about student privacy?

The demo holds no real student information. Before any real data is used, a full privacy and compliance review comes first.

IEP — a student's special education plan.

Counselor — a state rehabilitation counselor.

504 plan — a school accommodations plan.

Provider — the group that runs the services.

Referral — the request that starts services.

DARS — Va. Dept. for Aging & Rehab. Services.
