

TransitionBridge Virginia

UPGRADE GUIDE • BUILT FROM IEP PARTNERS' REVIEW

Safer, clearer, and one step ahead of every delay.

After reviewing the demo, IEP Partners asked for six improvements: protect student identities, keep one secure record per student, warn people before a referral is forgotten, show who is paying for each service, connect students with employers, and record who did what. **All six are now built into the demo** — and each one comes with its own short guided tour.

IF YOU ONLY

10 sec.

Students now appear by an ID instead of a name, every student has one secure record, late referrals raise an alarm at 14, 30, and 90 days, and every look, download, and change is written down.

1

Private by default

Students show up by a Transition ID. A name appears only when the school or counselor asks — and says why.

2

One secure record

The same profile for every student, with documents, dates, and who is allowed to open each one.

3

Early warnings

A referral that stalls is flagged at 14 days, raised at 30, and reaches the state office at 90.

4

Who is paying

Each service names its funder, with hours approved, used, and left. Sessions past the limit are stopped.

5

Employer matches

Open jobs and work sites near the student, matched to their career interest. Employers never see names.

6

Every action recorded

Names shown, files opened, lists downloaded, and anything refused — who, when, and why.

New guided tours. The step-by-step cards you already know now cover every upgrade. Look for the orange **New** tag. Missed one? Press the ? button at the top of any screen to replay it.

UPGRADE 1 • PRIVATE BY DEFAULT

A student is an ID first, a name only when needed.

Every screen, list, and download now shows a **Transition ID** instead of a name. It is enough for everyone to do their job — and it keeps a name from being seen by people who don't need it.

HOW TO READ A TRANSITION ID

- AN** the student's high school
- VA** Virginia
- 004661** the student's own number

WHEN SOMEONE NEEDS THE NAME

- 1 Click **Show name** on the student's record.
- 2 Pick a reason, such as "Contacting the family".
- 3 The name appears on that screen only.
- 4 Who, when, and why are saved in the log.

✓ Only the **student's school** and **DARS counselor** can ask. Providers and state leaders never see names.

UPGRADE 2 • ONE SECURE RECORD

Everything about one student, in one place.

TRANSITION RECORD

DEMO DATA

AN-VA-004661

Career interest	Health care
Support level	Moderate · paperwork attached
Accommodations	Documented · attached
Transportation	Needs support

Consent and release form

Added by the school · Renewed every year · School, DARS, and provider

Payroll document (W-9 / W-4)

Added by the provider · DARS and provider only

Need → help → progress → outcome

A simple strip across the top shows where the student is on their path.

The same profile for everyone

Five readiness areas, one rating scale, career interest, and support level. If paperwork is missing, it says so.

A secure document folder

Each document shows who added it, when it expires, and who may open it. Expired ones are flagged for an update.

Each agency sees its part

Schools don't see funding. Providers don't see medical records. The state sees progress, never names.

WHO SEES WHAT	SCHOOL	DARS COUNSELOR	PROVIDER	STATE LEADERS
Student's name	On request	On request	Never	Never
Profile and progress	Yes	Yes	Yes	Summary
Funding and hours	No	Yes	Own hours	Yes
Who-did-what log	No	Yes	No	Yes

UPGRADE 3 • EARLY WARNINGS

No referral sits and waits without someone knowing.

If a referral stops moving, it climbs a ladder. Each step up tells someone with more authority, so a stuck student can't be forgotten.

WHERE A REFERRAL CAN GET STUCK — AND WHO CAN MOVE IT

Waiting for a provider

Moved by the DARS counselor

Waiting on a consent form

Moved by the school

Waiting for a first session

Moved by the provider

UPGRADE 4 • WHO IS PAYING

Every hour has a funder — and a limit.

DARS — Pre-ETS

12 hrs approved

11 hrs used

1 hr left · near the limit

DARS

Medicaid (DMAS)

Virginia Works

School division

Grants

Workforce board

Other agencies

Over-billing is stopped before it happens. When a provider logs a session, the hours are checked first. A session that would go past the approved hours is refused, and the counselor can extend it — with a reason that is recorded.

UPGRADE 5 • EMPLOYER MATCHES

Real openings, matched to the student.

Pharmacy stock assistant

Part-time

Local pharmacy · \$14.50 an hour · 20 hours a week

✓ Matches career interest

✓ In the student's district

🚗 Reachable without a car

Job coach welcome

🔗 Share with the student's team

- ✓ A **job board** for counselors and providers, filtered by field and by “reachable without a car”.
- ✓ Each posting lists the matching students **by ID**. Employers never see a student.
- ✓ Where transportation is a barrier, car-free jobs are listed first.

Example: one late referral, three alerts

ILLUSTRATIVE • DEMONSTRATION DATA

For state leaders: a new “Who is paying” screen totals every funder and district — and the DARS amount matches the 15% reserve screen to the dollar, so the two can never disagree.

UPGRADE 6 • EVERY ACTION RECORDED

Who looked, what they took, and why.

WHEN	WHO	WHAT	REASON
Today	A. Davis DARS counselor	Viewed a student's name	Contacting the family
Today	A. Davis DARS counselor	Downloaded a list	State or federal reporting
Today	R. Miller Provider	⚠ Download refused	—
Today	R. Miller Provider	⚠ Service blocked — over authorization	—

Safe downloads. Every list asks why you need it, leaves out names, and is stamped with who took it and when.

Providers can't take lists home. Their roster stays inside the platform, where access is controlled.

One log for the whole state. State leaders see every name shown, file opened, download, and refusal.

HANDS-ON • ABOUT 5 MINUTES

See every upgrade in five steps.

1

Sign in as the DARS counselor (A. Davis)

Follow the "New" cards past **Early warnings** and **Funding and hours**.

2

Open a student's record

Students and transition records → any ID → **Show name**, with a reason.

3

Switch to the provider (R. Miller)

In **Log services**, give a low-hours student a long session. It's stopped.

4

Visit the job board

Open **Job board** to see which students each opening fits.

5

Switch to state leadership (J. Brown)

Access and audit log shows everything you just did. Then see **Who is paying**.

Scan to open the demo

Works on any phone or computer

Is this real student data?

No. Every student, record, employer, and dollar amount is made up so the demo can be shown safely.

Who can see names?

Only the student's school and DARS counselor, on request, with a reason that is logged.

Will it remember what I click?

Only in the browser you're using. The presenter can clear it before the next demo.

Transition ID — the code that stands in for a student's name.

Escalation — a late referral moving up the ladder.

Authorization — the hours a funder approved for a student.

Audit log — the record of who did what, when, and why.
